# UNITED STATES DEPARTMENT OF AGRICULTURE

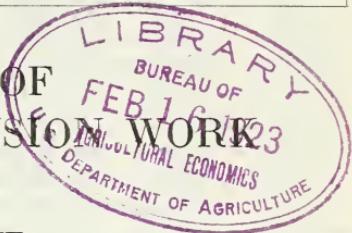

## DEPARTMENT CIRCULAR 253

Washington, D. C.

February 1, 1923

### STATISTICS OF COOPERATIVE EXTENSION WORK 1922-23

EUGENE MERRITT

A permanent nation-wide system of extension work to be carried on by the State agricultural colleges in cooperation with the Department of Agriculture was provided for by Congress in the cooperative agricultural extension act of May 8, 1914. This extension work includes practical instruction and demonstrations in agriculture and home economics given to persons not attending or resident in colleges in the several communities and the imparting of information through field demonstrations, publications, and otherwise, the work to be carried on in such manner as may be mutually agreed upon by the Secretary of Agriculture and the State agricultural colleges.

In order to provide a comprehensive basis for the cooperative extension work in the several States, a general memorandum of understanding between the department and the colleges was drawn up. This memorandum provides that each college shall organize and maintain a definite and distinct administrative division for the management and conduct of extension work in agriculture and home economics, in charge of a responsible director selected by the college and acceptable to the United States Department of Agriculture; shall administer through the extension division thus organized any and all funds received for such work from appropriations made by Congress or the State legislature, by allotment from the board of trustees of the college, or from any other source; and shall cooperate with the department in all extension work in agriculture and home economics which the department is authorized by Congress to conduct in the States.

Before any work requiring the expenditure of the cooperative extension funds is undertaken in a State the act requires that the plans for work shall have the approval of the Secretary of Agriculture. The director of extension of the college is required to submit detailed projects covering each line of extension work, with proposed allotment of funds for each, for approval by the department. After approval

of the projects the State is certified by the department to the Secretary of the Treasury as entitled to receive its share of the funds.

The number of persons engaged in the various lines of extension work on July 1, 1922, were as follows: County agricultural agent work, 2,433; home demonstration work, 975; boys' and girls' club work, 328; making, with specialists and others, a total of 4,487. The work is administered by the State extension directors assisted by State leaders of county agricultural agent work, home demonstration work, and boys' and girls' club work.

The total amount allotted for cooperative extension work in the United States in 1922-23 was approximately \$18,821,000, of which the Federal Government contributed \$5,880,000 under the provisions of the Smith-Lever Act. In addition, Congress, by direct appropriation to the Department of Agriculture, made available in round numbers \$1,028,000 for farmers' cooperative demonstration work and \$45,000 for extension work by the several bureaus of the department, making a total from Federal sources of \$6,953,000. The remaining \$11,868,000 was derived from sources within the States, including \$5,241,000 appropriated by the State legislatures and funds under control of the State agricultural colleges, \$5,654,000 provided by the different counties, and \$973,000 from other sources, mostly local.

This circular summarizes statistics relating to sources, amounts, and project allotment of funds used and number and distribution of persons employed in the cooperative extension work in agriculture and home economics, compiled from the approved budget statements in which the State agricultural colleges have outlined their plan of work for 1922-23.

TABLE 1.—Maximum amounts of Federal funds which each State is eligible to receive under the cooperative agricultural extension act.
